EDUCATION

VIT Bhopal University

B.Tech, Computer Science & Engineering

CGPA: 8.19 / 10

Apr 2026

TECHNICAL SKILLS

Languages: Python, SQL

Data Analysis and Visualization: Excel, Power BI, DAX, Pandas, NumPy, Matplotlib, Seaborn, OpenCV

Databases and Cloud: MySQL, PostgreSQL, AWS, Snowflake

Tools and Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Machine Learning: Scikit-Learn, Logistic Regression, KNN, Naive Bayes, Binary Classification

Core Competencies: Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Statistical Analysis, Data Visualization, Business Intelligence (BI), Cohort Analysis, Model Evaluation, ETL

EXPERIENCE

Data Analyst Intern

April 2026 – Present

Slash Mark IT Solutions (OPC) Pvt. Ltd

Remote

- Performed **exploratory data analysis** on structured datasets to identify missing values, outliers, feature correlations, and data quality issues, improving preprocessing efficiency for downstream analytics workflows.
- Created interactive visual reports and **trend analysis dashboards** to monitor dataset patterns, evaluate performance metrics, and support analytical decision-making.
- Worked on **computer vision-based image processing** tasks involving real-time color detection, pixel analysis, and RGB dataset matching for visual identification workflows.

PROJECTS

Karnataka Agriculture Data Analytics Pipeline | SQL, AWS, Snowflake, Power BI, DAX, ETL

🐙 GitHub

- Architected a secure **ETL** pipeline integrating **AWS S3** and **Snowflake** via **IAM** roles and External ID authentication, processing **3,100+** records and reducing manual effort by **90%**.
- Designed a centralized **Snowflake** data warehouse using **10+ SQL** transformations for **feature engineering**, ensuring data consistency and optimized BI reporting.
- Built dynamic **Power BI** dashboards with **6+ DAX** measures for 13 crop varieties, identifying high-impact crop yield variances based on irrigation methods and regional rainfall variability.

Credit Card Transaction and Customer Analytics | Power BI, PostgreSQL, SQL, DAX, ETL

🐙 GitHub

- Engineered a **Power BI** dashboard integrated with **PostgreSQL**, processing **667K+** credit card transactions and a **\$57M** revenue portfolio through scalable **SQL** ingestion pipelines.
- Created a **relational data model** with advanced **DAX** measures for customer segmentation, delinquency tracking, and cohort analysis, reducing manual reporting workflows by **80%**.
- Translated raw data into strategic insights by identifying a **28.8% WoW** revenue surge and isolating top markets (**TX, NY, CA** driving **68%** of revenue) to support data-driven business insights.

CreditWise - ML Loan Eligibility Predictor | Python, Scikit-Learn, NumPy, Pandas, Seaborn

🐙 GitHub

- Implemented a **Decision Support System** to automate loan approvals, reducing manual verification time and minimizing subjective bias in financial risk assessment.
- Conducted **Exploratory Data Analysis (EDA)** using **Pandas** and **Seaborn** to visualize distributions, handle missing data, and identify key financial correlations.
- Developed and evaluated machine learning classification models using **feature engineering** and **Logistic Regression**, achieving up to **88% accuracy** and an **81% F1-score**.

CERTIFICATIONS

Oracle Analytics Cloud 2025 Certified Professional

Valid till Sep 2027

Issued by Oracle

OCI 2025 Certified Data Science Professional

Valid till Oct 2027

Issued by Oracle

Data Analysis Essentials

May 2026

Issued by Cisco Networking Academy

Advanced SQL

Nov 2025

Issued by 365 Data Science
